

## Dartmouth College Fund Preliminary Results for Class of 1961 July 12, 2010

Well we pressed hard the last month and due to all of your efforts we did a great job on participation. We brought in an additional 78 donors in the last 14 days and 126 donors in the last 30 days. The result was:

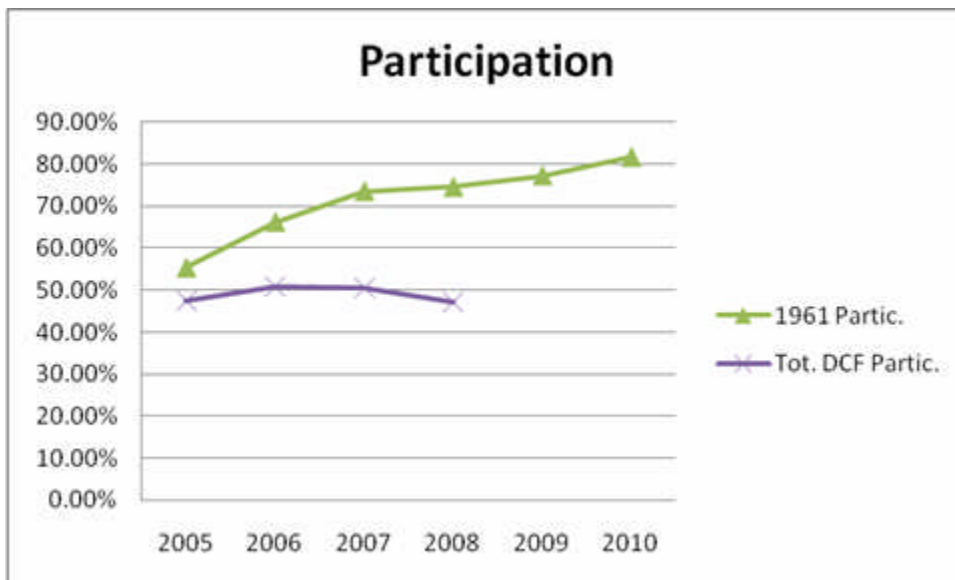

408 donors with a 500 base

81.6% participation vs 77.2% last year

You can see from the chart below how we have continued to increase the number of donors despite the shrinking base.

While I do not have the overall results for the college yet, you can see below that the class of 1961 has moved up participation in the last 5 years from 55% to almost 82%, which is a huge accomplishment, putting us far above the college overall result and it appears that we are likely to have the third highest class participation among all classes, including reunion classes.

I wanted to give you these results as soon as possible and to thank you all for your terrific efforts for the class. I will send more complete results as soon as they are available.....Denny Denniston
